Re: Complete Car Cleaning Service

Dear Mr. Hassler:

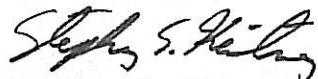

This office has been advised by the city of Springfield that a discharge is occurring from the operating location for the above referenced business.

Please be advised that the discharge of a hazardous or toxic material may constitute a violation of the Missouri Clean Water Commission's regulations. The Missouri Clean Water Law provides penalties of up to 10,000 dollars pending for each day, or part thereof, the violation occurred and continues to occur or both.

If a discharge is observed to be occurring from the above indicated operating location at any time after November 15, 1975, this matter will be referred to the Department of Natural Resources' Enforcement Section for appropriate action.

If you have any questions concerning this matter, please do not hesitate to contact this office.

Yours truly,

Stephen S. Kintner

Mr. Delbert Hassler
Complete Car Clean-up
215 N. Warren
Springfield, Missouri

Dear Mr. Hassler:

I would like to thank you for the courtesy extended to myself and Gene Pabst on our recent visit to your business. As we discussed at that time the discharge of clean-up waste water to the storm drainage system is a violation of City, State and Federal laws.

However, by steam cleaning inside the shop all flow enters the sanitary sewer via a grate in the east end of the shop. This arrangement is presently acceptable to this department as a means of elimination of discharge to the storm drainage system.

If you have any questions, or if we may be of further assistance do not hesitate to call.

Your very truly,

Robert Corson
Water Pollution Control Inspector
Surveillance & Enforcement
